

Information Security Incident Response Policy

1. Introduction

The purpose of this policy is to establish a framework for the University of Manitoba to respond to information security incidents. This policy is intended to provide a clear and consistent approach to the handling of information security incidents, ensuring that the University's information assets are protected and that the incident response process is effective. The policy applies to all University of Manitoba employees, students, and contractors who have access to University information systems and data.

- The policy is designed to ensure that the University of Manitoba is able to respond to information security incidents in a timely and effective manner.
- The policy is designed to ensure that the University of Manitoba is able to minimize the damage caused by information security incidents.
- The policy is designed to ensure that the University of Manitoba is able to identify the cause of information security incidents and take steps to prevent them from recurring.
- The policy is designed to ensure that the University of Manitoba is able to communicate effectively with the public and other stakeholders in the event of an information security incident.
- The policy is designed to ensure that the University of Manitoba is able to maintain the confidentiality, integrity, and availability of its information assets.
